

Regarding telemarketing, I think it should be stopped all together. I am tired of breaking my neck to get to the phone, to find out they are selling something. They should also have to show up on caller I.D. instead of (out of the area, unavailable etc.) We run a business at home and I cannot put a block on calls,because we have business's calling. I work for a bank and also have to make calls to customers between 4:30 to 6:30 during dinner hours to catch people at home and we have to do it to keep our jobs and I along with my co-workers,object, but have no choice if we would like to continue working, all the advertisements that go out in customers statements should be enough if they are interested, but banking has become so competitive.. Please stop telemarketing. Thank You!
